NetSuite for Ecommerce

One Application to Run Your Ecommerce Business

NetSuite is the one business application you need to run your ecommerce business. NetSuite makes it simpler to manage your online business better.

NetSuite lets you run your entire ecommerce business more efficiently—your Web store, inventory management, order fulfillment, and accounting systems, as well as your customer relationship management software. NetSuite also enables you to deliver an intuitive, "Amazon.com-like" experience to your customers, and better manage and grow your business within a single system.

In order to make the most of an online channel, companies need the tools to gather, analyze and leverage key data about their back- and front-office operations, vendors and partners, and most importantly, their customers. NetSuite's ecommerce offering makes this possible.

- One Application to Run Your Ecommerce Business
- Complete Web Store Features
- Web Site Building and Hosting
- Built-in Site Analytics & Reporting
- High Touch, Low Cost Customer Self-Service
- Best-of-Class Accounting/Financials
- Superior Ecommerce Marketing Tools
