NetSuite Small Business

NetSuite Small Business is the only online business application that streamlines both front- and back-office operations for growing businesses. NetSuite Small Business connects all the information you need—from lead generation to sales orders to product shipment—across your entire company. Since all data is held in a single system, you can access one real-time view of all crucial business metrics, allowing you to make smarter, faster decisions.

As a Web-based, hosted solution, NetSuite Small Business reduces your total cost of ownership (TCO). There is no software to install, no hardware to purchase and maintain, and no complex upgrades over time. NetSuite's team of IT professionals manages your maintenance, support, and upgrades at our world-class data center. As a result, you can focus on running your business, while NetSuite runs your software.

Why NetSuite Small Business?

Bring It All Together

With a single, integrated business application, your employees no longer have to re-enter data in different systems, rectify inconsistent or inaccurate data, or do complex system integrations. Just like your larger competitors, you can automate key business functions across all your departments, including sales, finance, purchasing, order fulfillment, and employee management at a price you can afford.

Get an Instant Snapshot of Your Business

NetSuite Small Business is the first product to offer customizable dashboards so you can see your key business indicators right now. View what your sales are today, how many leads you had today vs. yesterday, and who your top customers are this month—all with real-time dashboards.

Manage Your Business, not Software

As much as 90% of the cost of software is tied to managing it after it's bought. With NetSuite Small Business, there's no hardware or software to install—all of those costs are eliminated because NetSuite manages it for you at our world-class data center.

Anywhere, Anytime

With access anywhere through an internet connection and a browser, you and your employees can manage your business virtually anywhere.

Built for Your Business

Since NetSuite Small Business is designed specifically for growing companies, it offers affordable pricing and fast implementation. In addition, NetSuite Small Business is easily configured to fit your specific needs.
